

**ELIASSEN GROUP SERVICES:
SCRUM IMPLEMENTATION**

**INDUSTRY:
RETAIL**

BACKGROUND

A retail firm needed help implementing Agile Scrum methods for two key projects, their website and a robotic warehouse management system (WMS).

ELIASSEN GROUP AGILE PRACTICE APPROACH

Eliassen developed a project roadmap showing how the retailer could implement Scrum practices to its teams. Eliassen consultants delivered customized training workshops to provide a uniform level of understanding of Agile principle and Scrum techniques. A small team of Agile coaches helped roll out Scrum at two locations.

VALUE REALIZED TO DATE

The retailer was able to implement Scrum successfully, to increase development velocity, and to decrease the time required for a product launch. They are now rolling out Scrum for all IT projects across the company.
